

# Paediatric Examination & Assessment L7

BLMK Training Hub are pleased to be able to offer a Paediatric Examination & Assessment module at L7 through the University of East Anglia.

Live online study days: 10/04/24, 08/05/24, 05/06/24

Face to face Days (Norwich site): 24/04/24, 22/05/24, 19/06/24, 10/07/24

Learning style: Blended

Credits: 20

## Course Overview

This module enables registered health care professionals to develop enhanced knowledge and skills of paediatric consultation and structured clinical assessment of infants, children and young people from 0-19 years. A holistic approach to assessment will consider developmental stages, communication, anatomical and physiological differences, safeguarding, law and ethical principles that are unique to the paediatric population. Learning will be structured utilising an inspection, palpation, percussion and auscultation (IPPPA) approach of key body systems with frequent opportunity to practice and receive feedback on skills development using high fidelity paediatric manikins and equipment within a contemporary skills and simulation centre. An introduction to commonly presenting conditions, unique to children, and the associated pathophysiology and management will support practitioners in applying enhanced clinical assessment skills to autonomous decision making and/or escalation and referral. This module is suitable for trainee clinical paediatric advanced practitioner roles but will also be accessible as a stand-alone module for those clinicians who would like to develop enhanced clinical assessment skills with children, such as auscultation, for their own practice. Learners must have clinical opportunities to assess infants, children and young people in their own practice settings.

## Assessment

- Written Assignment - case study
- OSCE - a scenario (unseen) where learners demonstrate the skills of consultation, clinical examination, assessment and decision making.
